## U.S. PUBLIC LAND SURVEY MONUMENT RECORD

Corner to Section 16 21 T 35 N, R 16 E Quarter (Section/Quarter) T 35 N R 16 E SEC SEG 21

History of original corner establishment, record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence, and what you found and how the monument was

In 1858 James McBride set a wood post at this corner location at 40 chains with the following bearing trees:

Sugar

NO4W 5

Elm

S04W 29

Natural feature call of the stream falling at 22.30 chains on the west corrected line would fit better at 57.70 chains. Possible transcription error. Set up a search area at single proportionate measure point and found no evidence of occupation or corner. I determined the corner to be lost and set it at single proportionate measure.

O = Corner monument restored.

Set a 2"x 36" aluminum post with stamped cap. Ties are to aluminum nails set in tree centers which trees are blazed and scribed. Bearings are magnetic.

In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material, except wood other than bearing trees.) Also, show any material discrepancies between the corner restored or re-established and the location of any other previous corner location or occupation.
