SURVEY NOTES

This survey was made by the U.S. Department of Agriculture, Forest Service, for the purpose of restoring and establishing corners on the perimeter of Section 33 for establishing subdivisional corners within Section 33 and for locating and marking the boundaries of U.S. Government land on their perimeter and within Section 33 Township 34 North, Range 15 East, 4th Principal Meridian, Forest County, Wisconsin.

The U.S. Government lands in this section were acquired in 1935 and 1944.

The original government subdivision survey of this township was made in 1859. Nathan Smith made local surveys in 1899 and 1906.

The corner positions recovered, restored and established by this survey are marked by the monument described in the map legend.

The corner positions established were located to an accuracy of one part in 5000.

The bearings between corner positions are true bearings as determined by solar observations.

The field notes of this survey and a copy of this plat are on file in the Forest Supervisor's Office at Rhinelander, Wisconsin.
