#### SURVEY NOTES

This survey was made by John C. Schulke, a Registered Land Surveyor in the State of Wisconsin, for the U.S. Department of Agriculture, Forest Service. The purpose of the survey was for recovery, establishing, marking and perpetuating the corners and boundary lines of the U.S. Government Land on the perimeter and within Section 10, Township 38 North, Range 14 East, Fourth Principal Meridian, Forest County, Wisconsin.

The Original Government Survey of the township boundary was done by Artemas Curtis in 1857. The Original Government Subdivision survey of this township was done by J.L. Nowlin in 1865.

The bearings between corner positions are true bearings as referenced to adjoining surveys of Sections 22 and 23, Township 38 North, Range 14 East by John H. Fisher (RLS-836) dated in 1986 and Section 35 Township 39 North, Range 14 East by Wm. Cochrane (RLS-1107) dated in 1988. A mapping angle correction was applied to Section 35 to convert from State Plane Grid to true bearing.

The accuracy of this survey exceeds the State requirement for closure of 1 in 3,000. Corners recovered or restablished by this survey are marked as described in the map legend. Each monumented corner is referenced to blazed, scribed, painted, and tagged bearing trees. Tie bearings are magnetic, and corrected for declination.
