Original Bearings and Distances

- A. From $\frac{1}{2}$ center, North 89° East on East and West $\frac{1}{2}$ line to 1/16 corner 1321 feet.
- B. From $\frac{1}{2}$ center East 821 feet to an iron pipe on said East and West $\frac{1}{2}$ line.
- C. From above iron pipe South $3^{\circ}30'$ West 293 feet more or less to iron pipe on shore of Little Long Lake.
- D. From $\frac{1}{2}$ center South on North and South $\frac{1}{2}$ line - no bearing - distance of 540 feet more or less.

All lines measured with plumb bobs to center of pipes

I find the following:

- A. From $\frac{1}{2}$ center East on East and West $\frac{1}{2}$ line to 1/16 corner 1321 ft.
- B. From $\frac{1}{2}$ center North $85^{\circ}50'$ East 818.47 feet to original iron pipe on said East and West $\frac{1}{2}$ line. North 89° East is original Bearing of line in 1904 by N. H. Smith. Dad apparently did not take magnetic Bearing or solar and used old original Bearing. Reason - power line over head.
- C. From iron pipe on East and West $\frac{1}{2}$ South $00^{\circ}27'$ West magnetic distance of 294.72 to original iron pipe.
- D. From $\frac{1}{2}$ center South $00^{\circ}13'$ East Magnetic on North and South $\frac{1}{2}$ line 399.73 feet to original iron pipe.

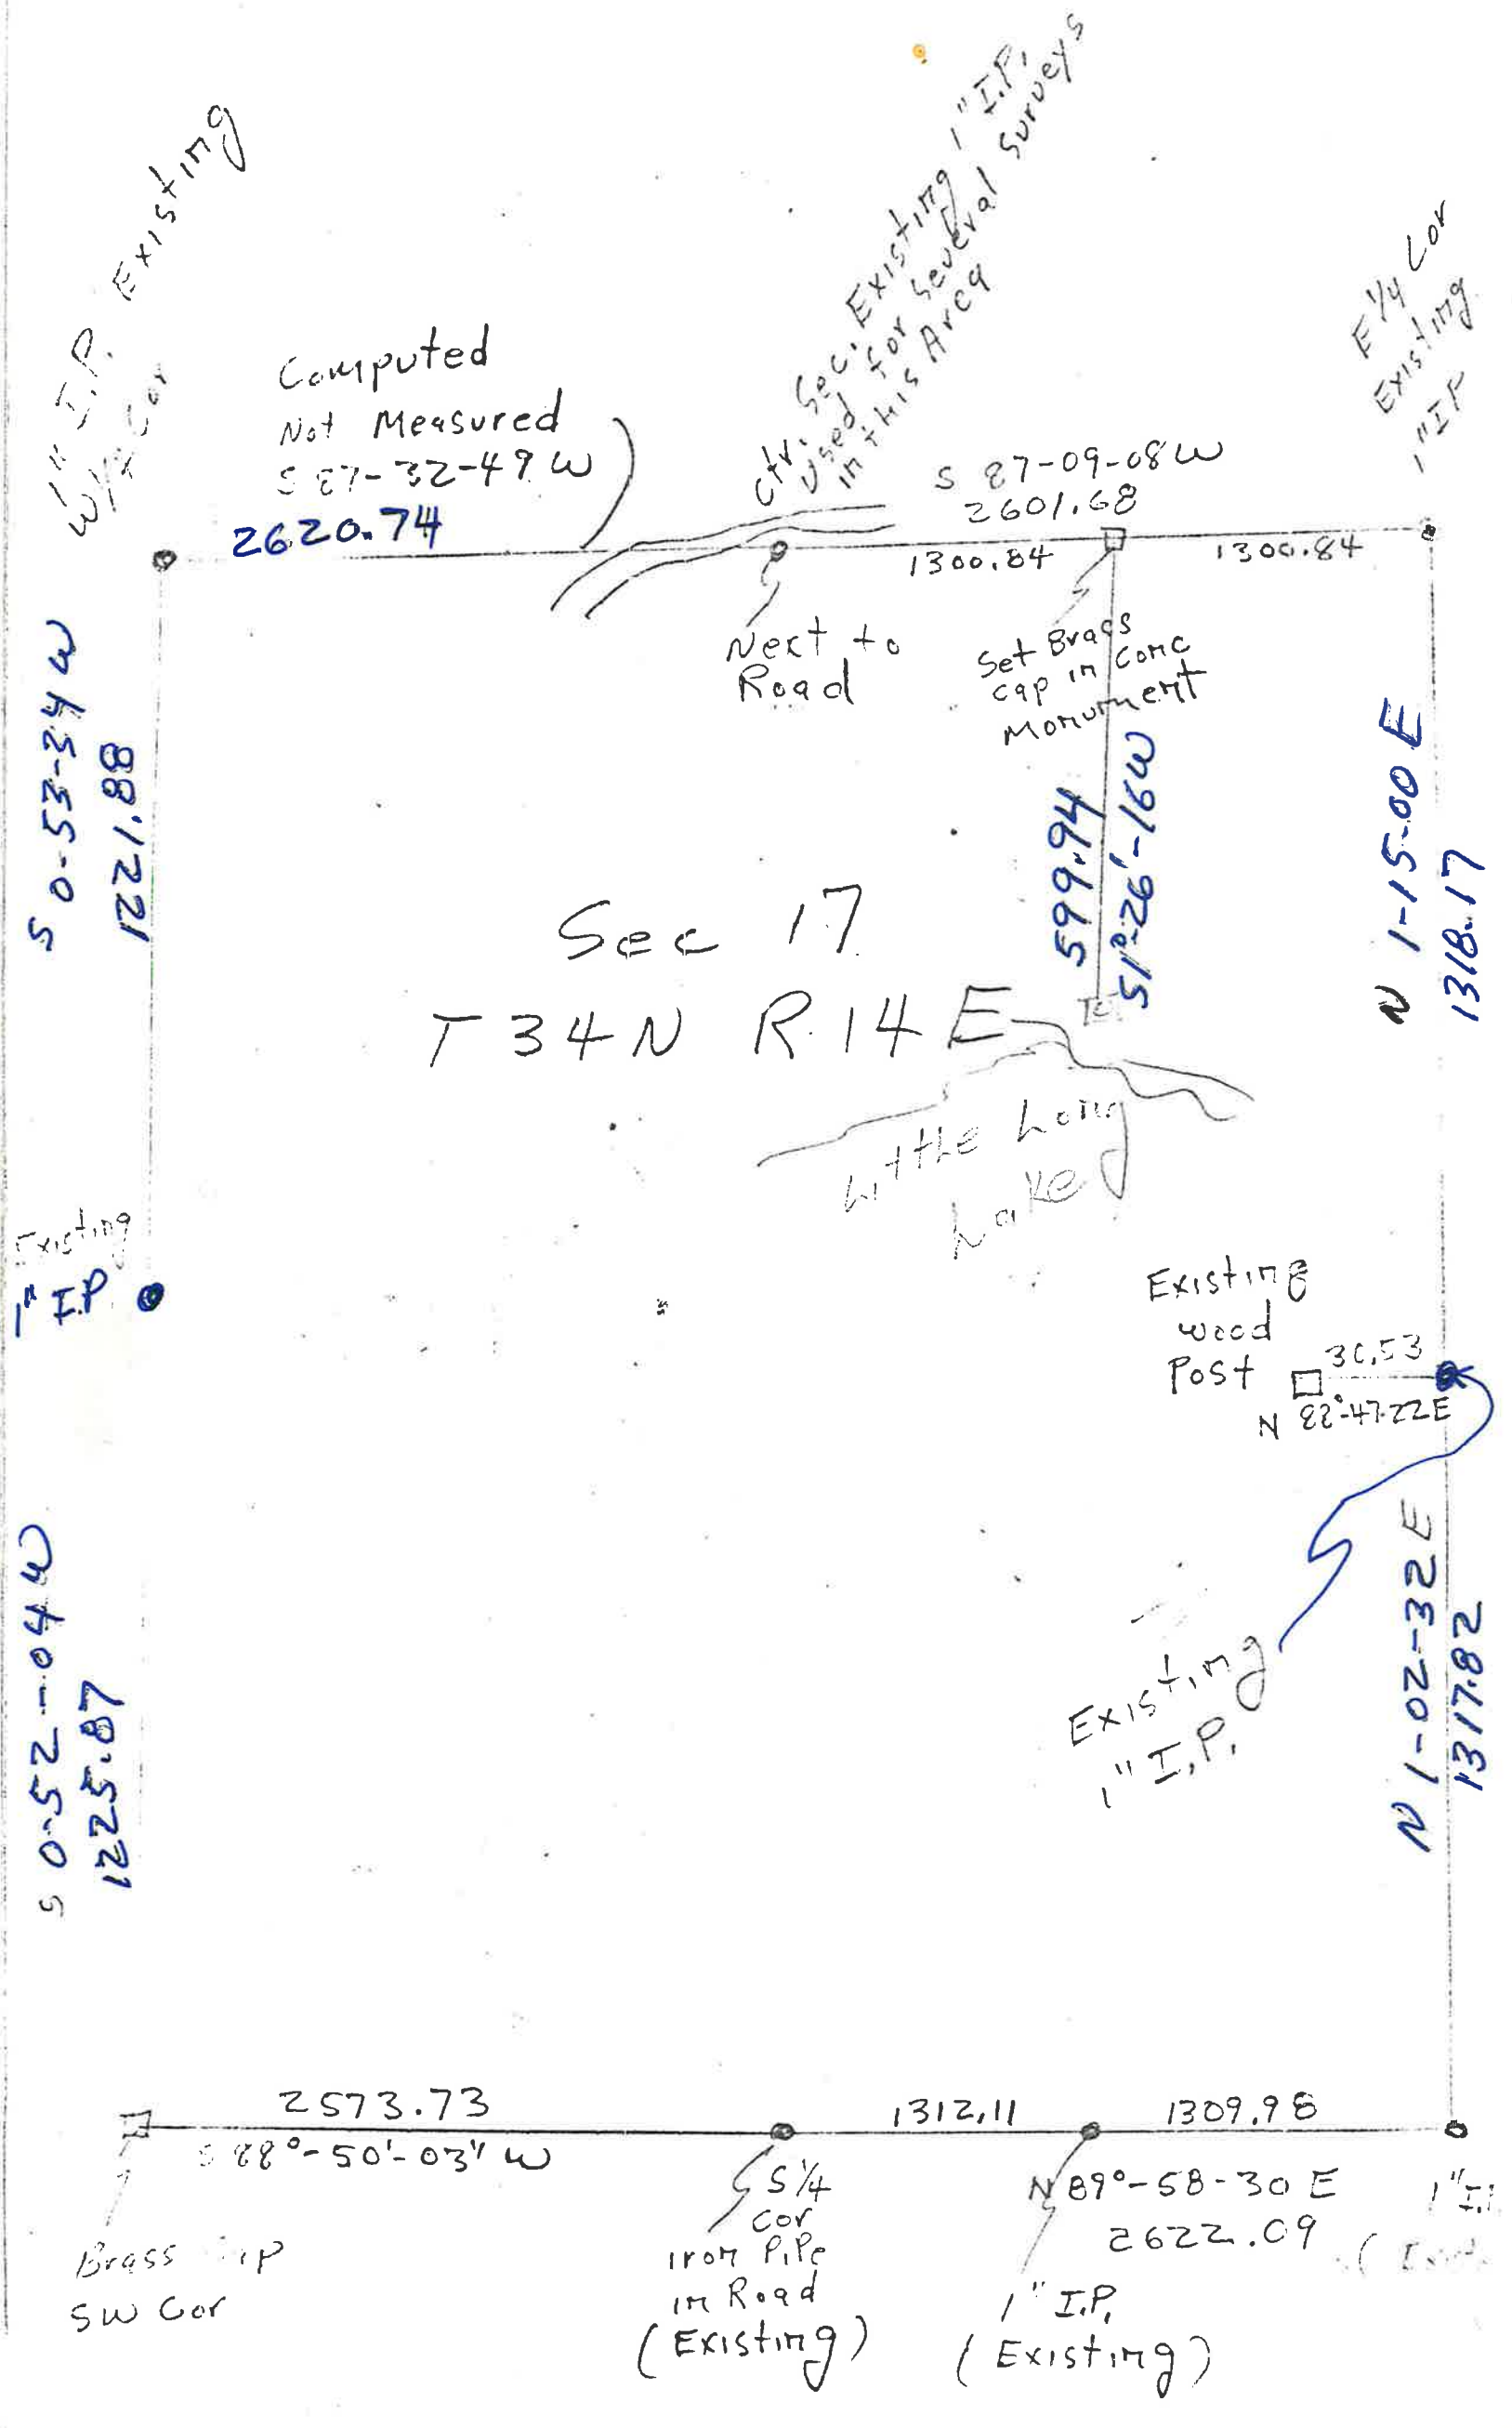

Reason for Magnetic Bearing on this Survey - overcast conditions on the days I surveyed. To make a trip of 35 miles one way to take solar or sun shot and the additional expense, I thought would be out of line. I ran the meander line back so far due to the big trees on the property and at this spot there was a small hole I could see thru without doing a lot of cutting.

I have enclosed a map that may further explain these field notes. If you have any question feel free to call or write.

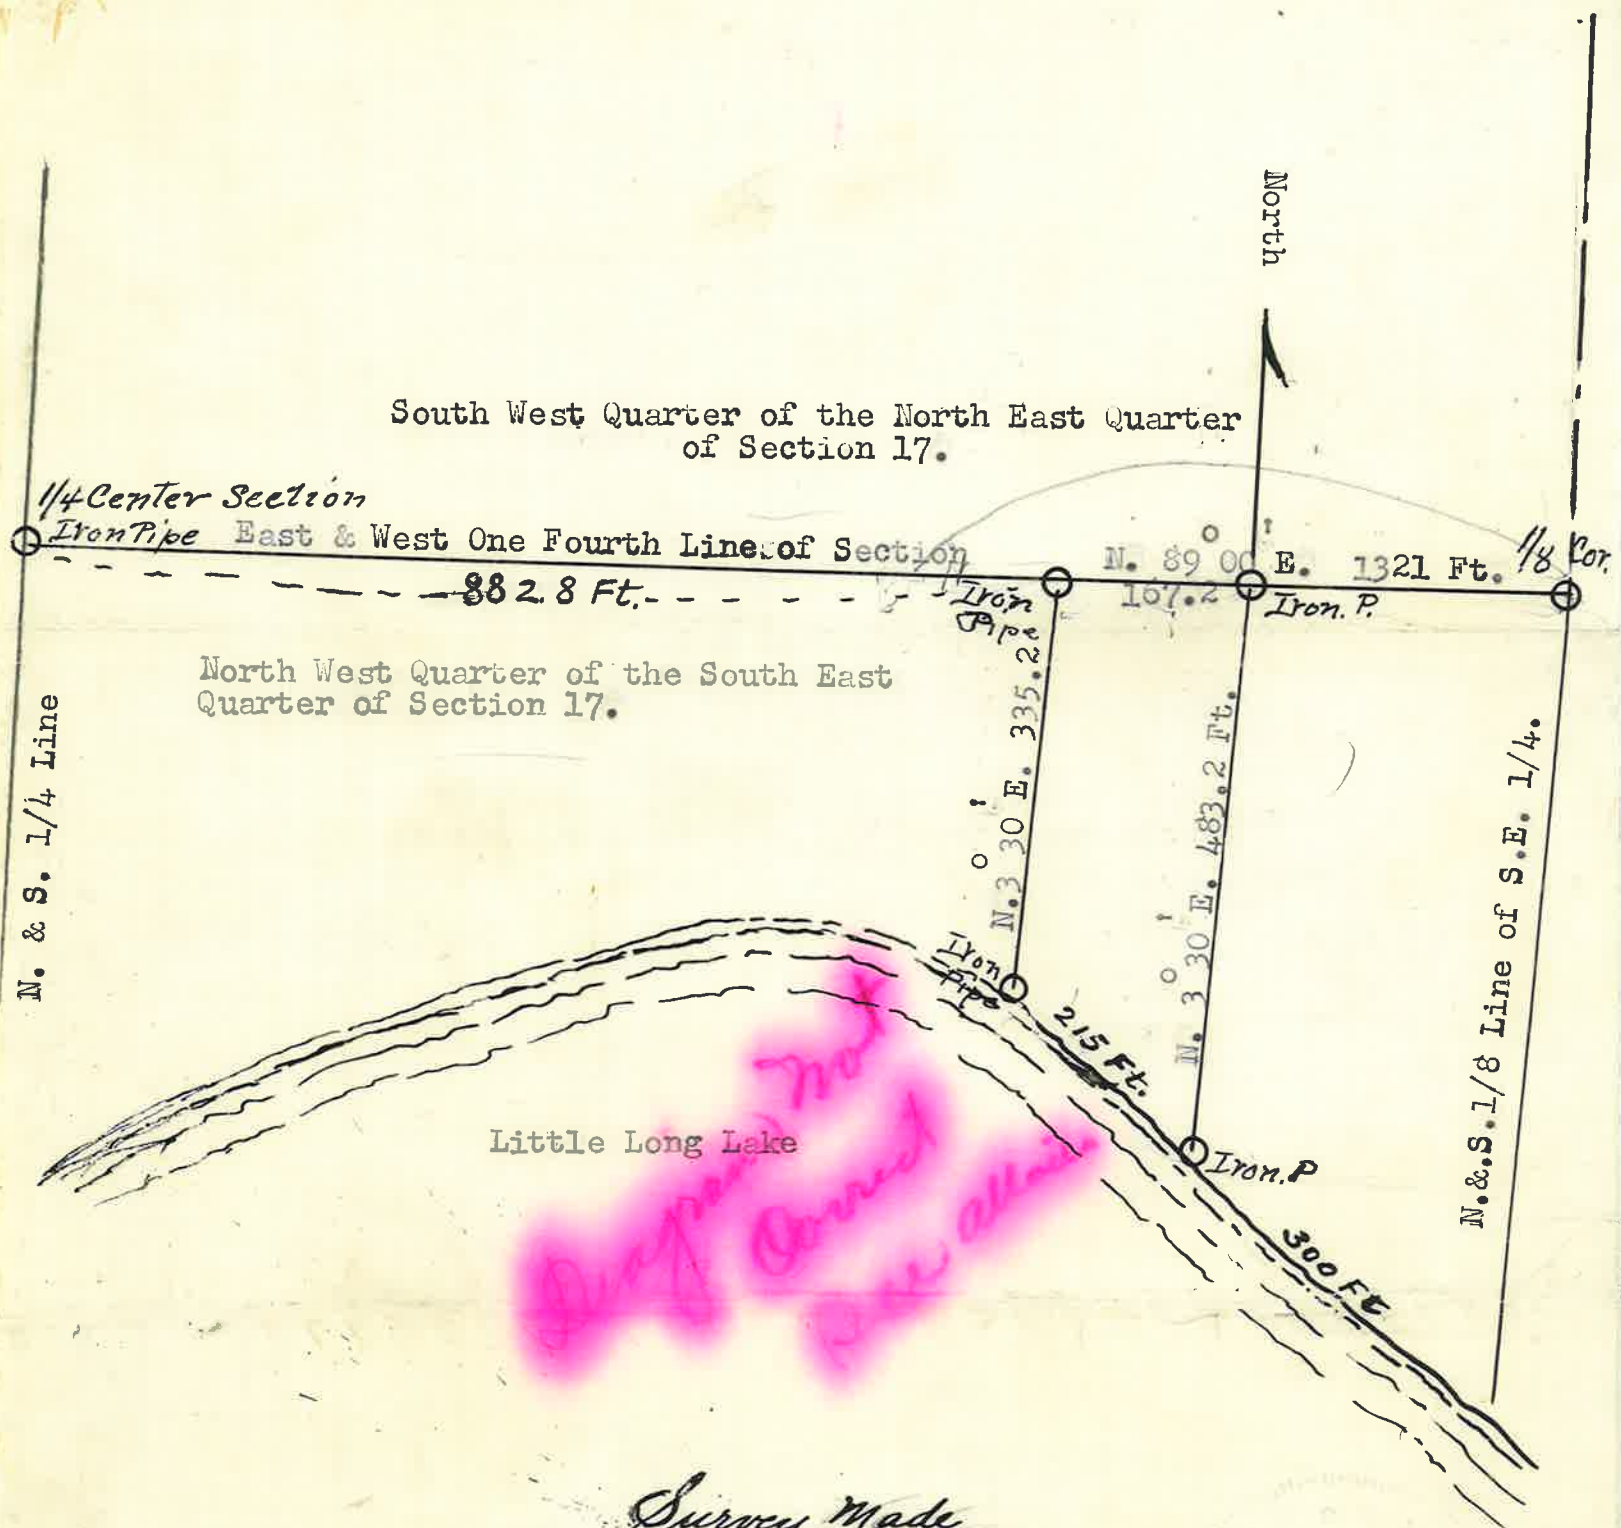

My telephone No. is 1-715-757-2754. Mailing address is Athelstane, Wis. My home is 10 miles East of Lakewood on County Highway F. If at any time you are up this way be sure and drop in for a visit. There are so few Engineers and Surveyors up this way that it is a real problem to be able to take time off for a visit. If I can be any help on field notes let me know and I will send down a copy of what I have.

Yours truly,

Paul N. Smith

A diagram drawn at 165 feet per inch showing location of part of N.W. of S.E. of Section 17, Township 34 North, Range 14 East, to be transferred with the S.W. of the N.E. of Section 17, same Town and Range.
